EDUCATION

Northeastern University | Boston, MA **September 2022 - August 2024**

Master of Professional Studies in Analytics | GPA: 3.6

University of Mumbai | Mumbai, India **August 2019 - May 2022**

Bachelor of Engineering in Computer Engineering | GPA: 3.8

Maharashtra State Board of Technical Education | Mumbai, India **August 2016 - June 2019**

Diploma in Computer Engineering | GPA: 3.5

SKILLS

Analytical: Data Mining, Data Visualization, Data Manipulation, Big Data Analytics, Predictive Analytics, Statistical Analysis

Languages: Python, R, SQL (MySQL, PostgreSQL, MongoDB, Oracle), C, C++, Java, HTML, JavaScript, PHP, Unix/Linux

Software: RStudio, Tableau, Power BI, QlikSense, Microsoft Office (Excel, Word, PowerPoint, Access), Google Apps (Docs, Sheets, Slides), Jupyter Notebook, Git, Databricks, Stata, Google Analytics, Looker

Libraries: Scikit-learn, NumPy, Pandas, Matplotlib, Plotly, Seaborn

Framework: Streamlit, PyCharm, Spark, Hadoop, ETL

Cloud Platforms: AWS-Amazon Web Services (EC2, Athena, Sagemaker), Microsoft Azure, Google Cloud Platform, Snowflake

WORK EXPERIENCE

World Justice Project | Washington, D.C. **September 2023 - March 2024**

Data Analyst Intern

- Created and published comprehensive USA and North Macedonia reports featuring 25+ data analysis charts using R and HTML, enhancing global awareness, and supporting policymaking. Link: [RuleofLawUSA](#), [RuleofLawNorthMacedonia](#)
- Automated the generation of 27 Excel reports from AWS data, utilizing Python to build pipelines for summarizing news data and performing sentiment analysis, optimizing for multiple KPIs resulting in a 98% reduction in report generation time
- Revolutionized the creation of Rule of Law reports, by building an innovative dynamic HTML webpage using Flask, which reduced development time by 93%, simplified code by 85%, and automated report generation, thus enhancing efficiency
- Deployed a Naive Bayes model to classify over 10,000 news articles related to the rule of law, achieving an accuracy rate of 84% and streamlining the news analysis process by 67%

AINE AI | Mumbai, India **August 2021 - January 2022**

Data Scientist Intern

- Analyzed customer behavior and retention trends, predicting high-risk customer churn with 90% accuracy using insights from telecom data sets and identifying trends in customer satisfaction to inform market strategy and revenue optimization.
- Improved work efficiency of the company by 84% by forecasting customer churn using call center interactions, usage patterns, and demographic information, directly aligning with customer segmentation and targeted marketing efforts
- Developed interactive dashboards using Business Intelligence tools like Tableau and Power BI to visualize engagement metrics, enabling senior management to optimize retention strategies, resulting in a 20% increase in engagement

SIES Graduate School of Technology | Mumbai, India **June 2021 - July 2021**

Data Scientist Intern

- Adopted Agile/SCRUM principles in analyzing Quantum Computing data, employing techniques such as Neural Networks
- Incorporated Natural Language Processing techniques, such as lexical R j i uitr5s ð ln Qio2,t extrac
